

MedeAnalytics offers an extensive suite of customizable solutions powered by a highly adaptable web analytics platform, delivered and supported by an experienced client services team.

Provider Solutions

Solutions Suite Overview

For more information, visit www.medeanalytics.com/solutions

Patient Access Intelligence*: Integrated Financial Clearance and Front-End Intelligence

Patient Access Intelligence provides real-time intelligence during the patient registration and financial clearance process. Directly integrated into the hospital registration system, Patient Access Intelligence includes patient payment estimation, charity care screening, address validation, risk segmentation and insurance eligibility verification in one simple interface designed for front-end staff. The solution leverages a variety of third-party data sources and predictive modeling techniques to appropriately segment patients prior to service and prompt registrars with the appropriate action using customized business rules and logic.

Clinical Performance Manager*: Transparency into Clinical Cost Drivers and Quality Outcomes

Clinical Performance Manager empowers clinical and financial decision makers to monitor physician performance and understand the key drivers of cost and quality. MedeAnalytics aggregates disparate cost, revenue, utilization, patient satisfaction and core measures data into one unified analytics platform that provides insight into service line margins, physician cost variability, clinical resource utilization and quality outcomes. The solution also enhances individual physician transparency through physician-centric dashboards that enable physicians to compare their clinical and financial performance to peers and industry targets.

Revenue Cycle Analytics*: Daily Insight into Accounts Receivable Performance

Revenue Cycle Analytics provides hospital business office management with daily insight into accounts receivable, billing and collections performance. Financial managers and patient accounting staff are empowered to proactively identify revenue cycle bottlenecks, eliminate A/R aging outliers, reduce billing and coding delays, understand payer reimbursement trends and significantly improve collector and coder accountability.

Quality and Compliance Analytics*: Proactively Manage Your Regulatory Compliance Risk

Quality and Compliance Analytics provides daily insight into compliance risk areas, coding trends and audit appeal workflow. Leveraging RAC, MIC and commercial payer audit rules as well as third-party benchmarks, MedeAnalytics enables healthcare providers to more proactively manage compliance risk by establishing daily compliance dashboards and proactive alerts. The solution also provides a robust workflow to effectively manage the multiple deadlines, documents and hand-offs of a complex compliance audit.

Self-Pay Analytics*: Intelligent Segmentation of All Self-Pay Balances

Self-Pay Analytics enables healthcare providers to intelligently segment and prioritize all self-pay patient accounts, including both uninsured and self-pay after insurance. Leveraging third-party demographic, financial and credit data, combined with detailed historical information from the patient accounting system(s), MedeAnalytics enables healthcare providers to understand the collectability of each patient account, segment out patients who qualify for charity, resolve demographic errors and ensure that Medicaid eligibility is never missed.

Payer Performance Analytics*: Daily Insight into Reimbursement and Claims Adjudication

Payer Performance Analytics provides daily insight into the performance of payer contracts and the claims adjudication process. Leveraging historical payer information, in conjunction with contract repricing and 835 ERA remittance data, MedeAnalytics enables healthcare providers to establish robust payer performance metrics and scorecards. Payer Performance Analytics also includes denial management and appeal workflow capabilities to ensure timely appeals and accountability for avoidable denials.

Productivity Analytics*: Monitor Staff Productivity and Labor Expenses

Productivity Analytics provides hospital management with insight into salary costs and the utilization of clinical staff resources. Leveraging information from scheduling, payroll and staff assignment systems, MedeAnalytics enables department and nurse management to understand staffing trends, cost drivers, skill mix and coverage ratios.
